

Securing success in KS2 Writing

– DfE approved and TSH-accredited CPD

VNET Education CIC bring you this DfE approved, TSH-accredited, year-long programme designed to make a significant impact on the gaps in learning created by the pandemic and aims to ensure that pupils are securely ready for the challenges of the Key Stage 2 writing curriculum.

The project consists of 6 online sessions over the academic year and costs £750+VAT per school. [Click here for dates, times and more information](#)

PROJECT OUTCOMES

- ✓ To provide teachers with accessible and research-informed strategies that will move pupils forward in their writing
- ✓ To develop familiarity with tried and tested approaches to support children in improving sentence structure, demarcation and spelling
- ✓ To know and understand how to scaffold pupils' knowledge of the text and grammatical features so that pupils can apply these skills automatically during independent writing activities
- ✓ To understand the expectations for sentence structure and demarcation for the KS2 phase
To accrue a range of strategies to embed within classroom practice.

There is growing evidence that pupils' writing in KS2 has been most significantly affected by Covid-19, with lower attainment than previous cohorts across all subjects. Arguably the most significant challenge has been identified in children's writing. These issues have been particularly apparent for lower Key Stage 2 children, whose entire experience of EYFS and Key Stage 1 was severely disrupted.

Evidence tells us that high-quality teaching is the most important factor in improving attainment outcomes, so schools must focus on developing teaching practices over a sustained period to drive meaningful change in their setting and track impact. Similarly, English outcomes are vital for the whole school and individual pupil success, and essential skills such as reading can unlock access to the entire school curriculum.

VNET Education CIC are uniquely placed to support your school improvement journey.
